

Garden City Schools

Garden City
New York 11530

Dear Garden City Parent/Guardian:

Graphing calculators have become an integral component of our mathematics curriculum content and instructional methods. There are many topics that make it mandatory for our students to have access to their own calculators. Additionally, graphing calculators are a requirement for the mathematics Regents examinations.

The Garden City School District can issue to your child a graphing calculator (model TI84+) for his/her instructional use while enrolled in mathematics courses in Garden City High School. The calculator will have the official "school bus yellow" cover, will be inscribed with the phrase "School Property" and will contain an inventory code. Your child would be required to return this calculator to the District upon the completion of his/her last mathematics course and prior to graduation. If issued a school district calculator, your child would be responsible for the maintenance and security of the equipment, which would include the occasional replacement of the batteries. Should this graphing calculator become lost or damaged, your child would be responsible for the replacement cost of the calculator (\$105).

If you wish for your child to be provided with a district graphing calculator issued by the school district, please complete the bottom portion of this letter and return it to the Garden City High School Mathematics Department.

Sincerely,

Stuart C. Dods
Mathematics Curriculum Coordinator

- I will provide my child with their own graphing calculator.
- Please issue to my child a district graphing calculator. I understand that he/she is responsible for the maintenance and security of this calculator. This calculator will be returned to the district upon the completion of my child's last mathematics course and prior to graduation.
