

# **Garden City High School Mathematics Department**

## **Grading Policy**

All of the High School and Middle School Mathematics courses use the same general grading methods and policy to evaluate the quarter grades.

90% of the Quarter Grade is based upon a total-points analysis of classroom assessments for the given quarter.

Classroom assessments can include tests, quizzes, projects, writing assignments, graded homework assignments, etc.

10% of the Quarter Grade is based upon non-traditional assessments that might include class participation, group learning projects, homework completion, class exit activities, etc.
