## **LIRR Expansion Project – Stay Informed**

The LIRR Expansion Project is progressing on-time throughout the project corridor. Currently underway in our neighborhood is the replacement of **Nassau Boulevard Bridge**, which has been the site of numerous truck strikes over the years. Removing and replacing this aging, low-hanging bridge is expected to significantly reduce these types of incidents and delays. This work requires temporary roadway detours and may change your route to school.

During this phase of the work, Nassau Boulevard is restricted to one southbound lane under the bridge. Northbound traffic is being directed to follow a detour plan along Rockaway Avenue (see [www.lirrexpansion.com](http://www.lirrexpansion.com) for a detailed map). At least one pedestrian sidewalk under the bridge will remain open during this phase.

The “roll-in” of the new bridge is schedule for the weekend of October 4, 2019. The project team will continue to keep us apprised of additional traffic pattern changes as that date approaches. We encourage you to register for updates at [www.LIRRExpansion.com](http://www.LIRRExpansion.com). Among other information on the site, you can view detailed monthly “look-ahead” updates specific to our community by clicking on Community News, then on Garden City/Garden City Park.
