

Anatomy and Physiology **Mrs. Dubuke**

Welcome to class! I look forward to helping you discover the amazing tool that is your body. This class will demonstrate the functions of the different systems of the body (physiology) as well as the correct medical terms for those systems and their parts (anatomy). This will be a survey course which will cover all of the body systems using readings, labs, demonstrations, dissections and projects.

Supplies:

1. Pens
2. #2 pencils (for tests and labs)
3. Colored pencils (12 pack is plenty)
4. 3 ring binder with paper or notebook with folder

Classroom expectations:

1. Safety First! All safety rules must be followed at all times, including no food, gum or hats. Hair must be tied back during lab work.
2. Be respectful and courteous of others.
3. One person speaks at a time so all can hear and understand.
4. Come prepared with your supplies, including your brain, to every class ready to work.
5. We all work for a full 42 minutes so be ready when the bell rings.

Grading:

Your grade will be calculated as: 50% tests and quizzes, 25% labs, 15% quarterly projects and 10% homework. There will be 1 project per quarter. Details will be given at the time of the assignment.

Missing work:

It is your responsibility to make-up any missed work. Homework should be turned in the next school day when you return and tests may be scheduled during extra help periods.

Extra Help:

Extra help is available Monday in room 205. Other times may be available by appointment.
